

Step by Step Guide to Customise your Complete System Backup

Step 1: Connect hard drive to PC

Step 2: Click 'Modify' to select desired backup destination

The screenshot shows the NTI Backup Now EZ interface with three backup configurations:

- Cloud Backup:** C: Pictures (311.88 MB) backup location is NTI Cloud (TSP-PC) (Not connected). Frequency: Monthly on the 1st. Status: Completed with errors.
- File and Folder Backup:** C: Music, Videos, Pictures... (11.05 GB) backup location is External Disk (Unavailable) (0.00KB free of 0.00KB). Frequency: Hourly. Status: Failed to backup.
- Complete System Backup:** Local Disk (C:) (My Computer) backup location is External Disk (Unavailable) (0.00KB free of 0.00KB). Frequency: Weekly on : Wednesday. Status: Failed to backup.

A red box labeled "Step 2" points to the "Modify" link under the External Disk (Unavailable) backup location for the Complete System Backup.

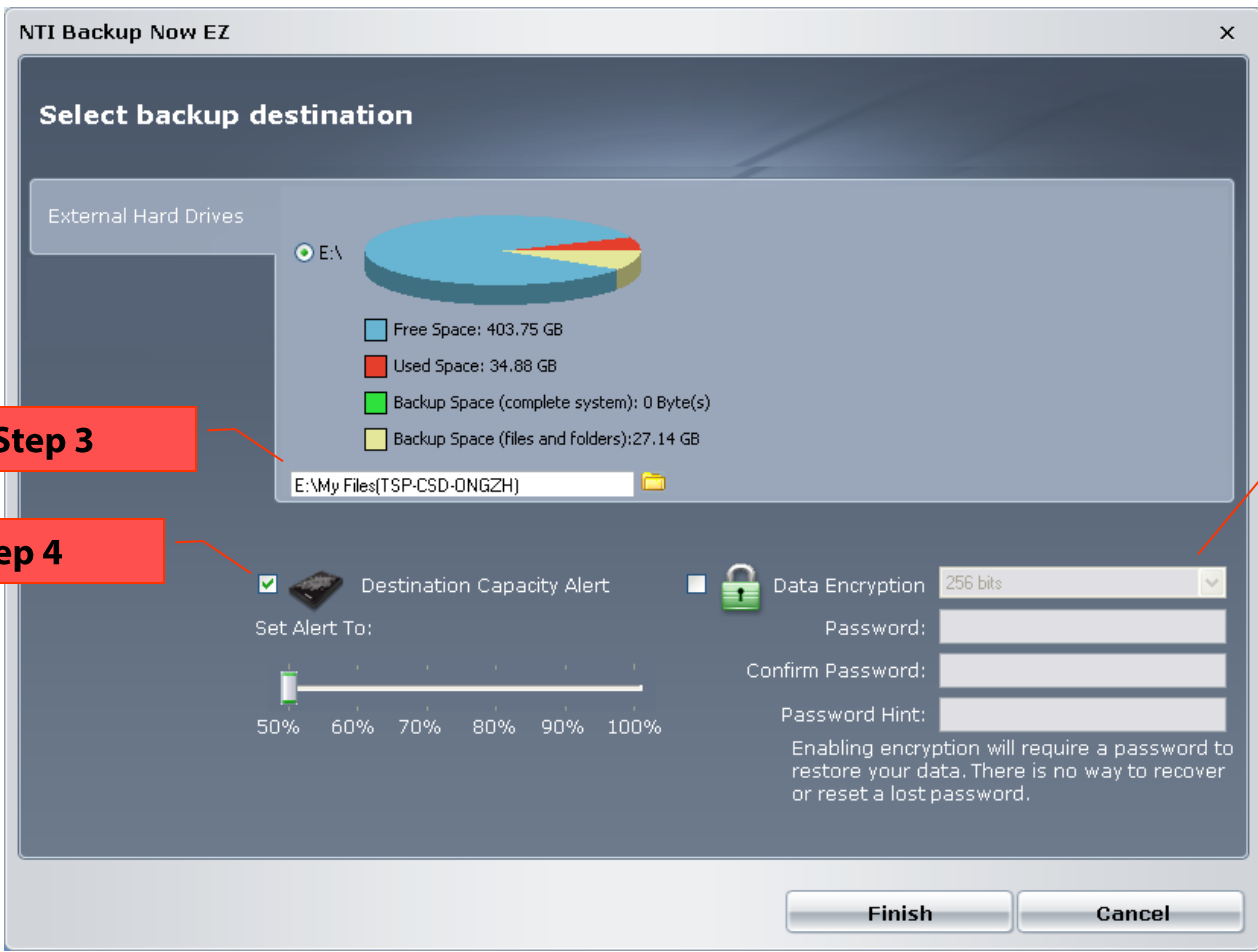

At the bottom, there is a warning icon and the text: "Status Details: One or more jobs did not run. Click on 'Backup' to run the job now." There are also "Show My Files", "Backup", and "Restore" buttons.

Step 3: Choose the backup destination (e.g. external hard drive)

Step 4: Select if you want to be alerted when your external hard drive (selected in step 3) is running low in capacity

Step 5: Secure your backups with a password

Step 6: Click 'Finish'

Step 3

Step 4

Step 5: Data encryption with password

Step 7: Click 'Modify' to schedule your backup routine

The screenshot shows the NTI Backup Now EZ interface with three backup configurations:

- Cloud Backup:** C: Pictures (311.88 MB) - Backup Location: NTI Cloud (TSP-PC) Not connected - How Often: Monthly on the 1st. Status: Completed with errors. [Modify](#)
- File and Folder Backup:** C: Music, Videos, Pictures... (11.05 GB) - Backup Location: External Disk (Unavailable) 0.00KB free of 0.00KB - How Often: Hourly. Status: Failed to backup. [Modify](#)
- Complete System Backup:** Local Disk (C:) - Backup Location: External Disk (Unavailable) 0.00KB free of 0.00KB - How Often: Weekly on : Wednesday. Status: Failed to backup. [Modify](#)

A red box labeled "Step 7" points to the [Modify](#) link for the Complete System Backup configuration.

Status Details: One or more jobs did not run. Click on "Backup" to run the job now.

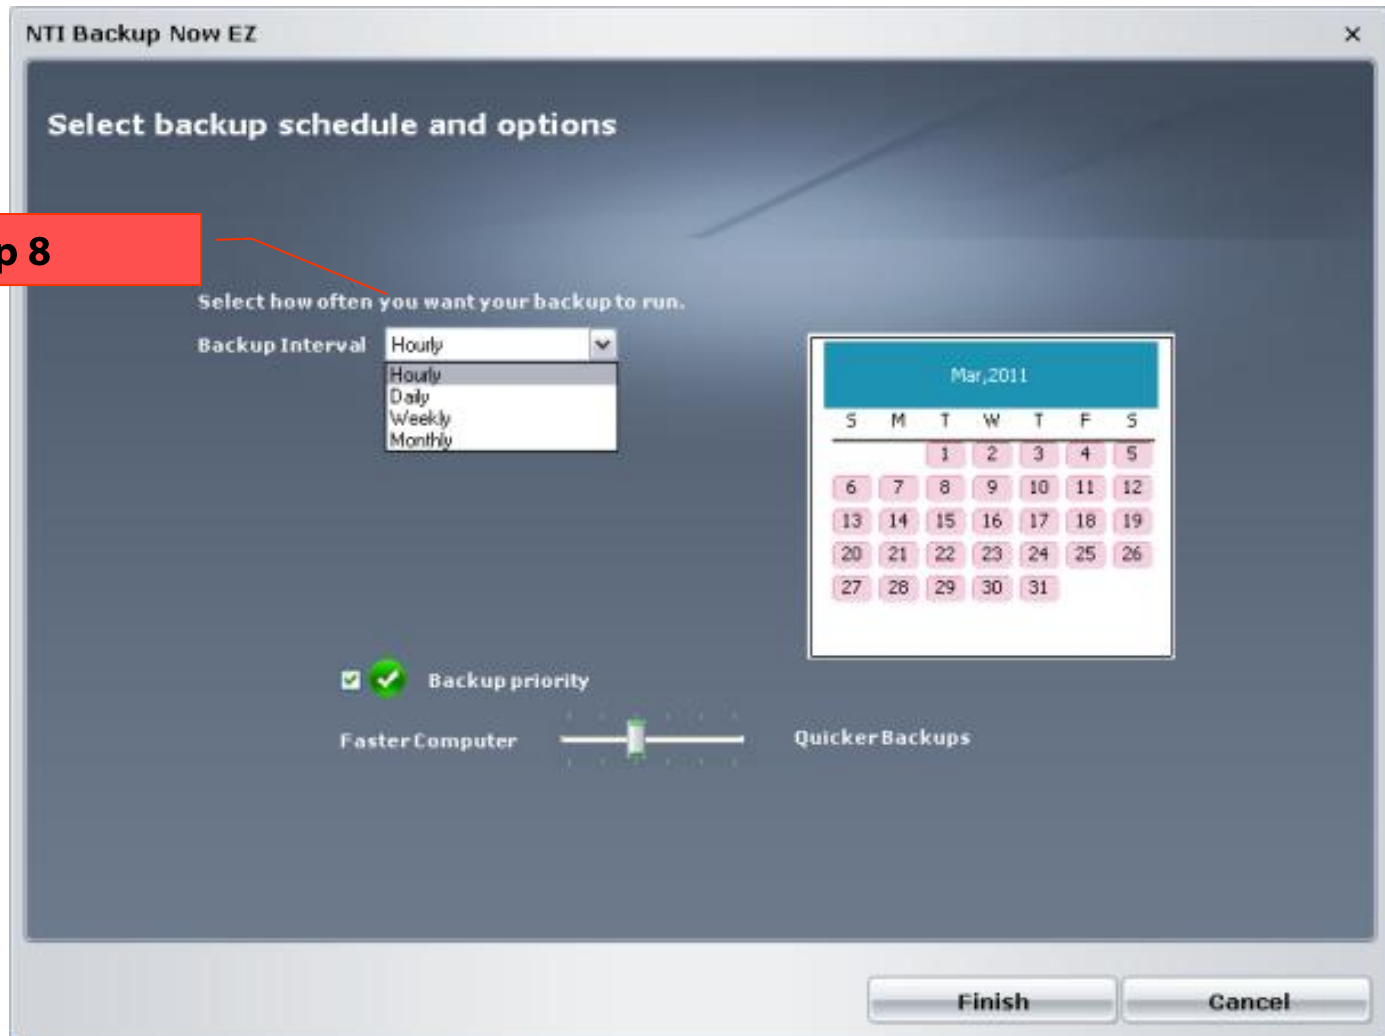

Show My Files

Backup **Restore**

Step 8: Choose your desired backup interval
(Optional: Select 'Backup priority' and set your preference between 'Faster Computer' and 'Quicker Backups'. For 'Quicker Backups', backup process will be faster, but may affect performance of other running programs.

Step 9: Click 'Finish' to complete setup.

Step 8
