Toshiba Canvio® Connect II Portable Hard Drive

Full System Backup • Connect Remotely

The Canvio® Connect II Portable Hard Drive is designed for Smartphone/tablet users who want to access and backup their data to hard drives remotely via iOS/Android apps. The Canvio® Connect II is also suitable for users who want to backup and restore their Windows laptop in event of PC crash.

Coupled with Pogoplug® PC Software, it makes it possible for users to leave Canvio® Connect II at home, and still have access to files on hard drive via iOS/android app from Smartphone - as long as the hard drive is connected to an internet-enabled PC. Using this connection, users can also upload files from Smartphone to the hard drive.

Canvio® Connect II has the ability to clone a PC, and users can choose to recover a file, folder or restore a laptop from PC crash with NTI® Backup Now EZ™. The application also comes with customisable options like, automatic backup scheduling, selection of file/folder for backup, and setting a password to secure backups.
